PROFESSIONAL SUMMARY

Battle-tested Site Reliability Engineer with 6+ years of experience orchestrating global multi-region Kubernetes platforms, automated GitOps deployments, and high-uptime cloud infrastructure on AWS. Strong expertise in Terraform IaC, Prometheus metrics, and automated disaster recovery.

CORE TECHNICAL COMPETENCIES

Cloud & Orchestration: Kubernetes (EKS) • Docker • Terraform • AWS (VPC, RDS, IAM) • ArgoCD

Observability & SRE: Prometheus • Grafana • OpenTelemetry • Alertmanager • SLO/SLI Dashboards

Networking & Security: Cilium eBPF • mTLS • Cert-Manager • Vault • Cloudflare

Languages & Automation: Golang • Python • Bash Scripting • GitHub Actions CI/CD

PROFESSIONAL EXPERIENCE

Senior SRE Lead — FinTech Cloud UK Ltd.

2021 – Present | London, UK

- Managed 12 multi-region Kubernetes production clusters maintaining 99.99% service availability.
- Standardized infrastructure provisioning via Terraform and ArgoCD GitOps, reducing environment spin-up time to under 15 mins.
- Implemented unified telemetry and custom Prometheus exporters across 60+ microservices.
- Conducted quarterly chaos engineering exercises and architected automated multi-region failover routines.

Cloud Infrastructure Engineer — GlobalScale Networks

2019 – 2021 | London, UK

- Migrated legacy on-premise application workloads into containerized AWS EKS clusters.
- Engineered automated zero-downtime rolling upgrades and PodDisruptionBudgets.

EDUCATION

B.Sc. in Computer Networks & Systems — Imperial College London (*First Class Honours*)

2019

CERTIFICATIONS & CREDENTIALS

🏆 Certified Kubernetes Administrator (CKA)

🏆 Certified Kubernetes Security Specialist (CKS)

🏆 AWS Solutions Architect – Professional
