PROFESSIONAL SUMMARY

Graduate AI researcher and prospective intern with strong background in automated prompt evaluation, LLM safety rails, and Python NLP workflows. Researching synthetic data generation, anti-jailbreak defenses, and structured JSON generation at UC Berkeley.

CORE TECHNICAL COMPETENCIES

AI & NLP: Python • PyTorch • Prompt Engineering • LLM Evaluation • Hugging Face Transformers

Tools & Frameworks: LangChain • LlamaIndex • Pandas • NumPy • FastAPI • JSON Schema

Evaluation Metrics: Semantic Similarity • BLEU/ROUGE • Hallucination Detection • Prompt Injection Testing

PROFESSIONAL EXPERIENCE

AI Research Assistant — Berkeley AI Research (BAIR) Lab

2024 – Present | Berkeley, CA

- Developed benchmark evaluation suite testing LLM candidate assessment consistency across 1,000+ prompt permutations.
- Researched adversarial prompt injection vectors and formulated defensive system prompt rails with 99.4% mitigation rate.
- Synthesized diverse domain-specific resume test fixtures to evaluate CV extraction accuracy and rubric scoring models.

Machine Learning Intern — PromptTech Innovations

Summer 2024 | San Francisco, CA

- Built automated Python scripts to evaluate LLM structured JSON output compliance against complex Pydantic schemas.
- Curated training datasets and fine-tuned lightweight classification models for candidate skill tag extraction.

EDUCATION

M.S. in Artificial Intelligence & Robotics — UC Berkeley

Expected 2025

B.S. in Data Science & Mathematics — UCLA (*Summa Cum Laude*)

2023
